

## MP-HI M8/M10

### Twin screw insulated pipe ring

#### Applications

- Fresh water distribution pipes
- Heating pipes
- Gas distribution pipes
- Waste water distribution pipes

#### Features:

- Securely fixed rubber inlay - no loss of rubber
- Two-screw pipe ring with side swivelling mechanism
- Safe click closure for easy and fast pre-fixing
- Short connection boss for closer installation to wall or ceiling
- Double connection boss
- Clamping range without gaps

#### Securely fixed rubber inlay

The rubber inlay is glued into the bow increasing work productivity. The pipe can be easily moved and adjusted without any risks of losing the rubber, saving time and worry.

#### Safe closure with click

The bow swivels into the screw with a clear indication of safe pre-fixing ("click" sound). Installation can be safely completed up to the final closing.

#### Technical data

Recommended static load for suspended installation –  $F_{rec}$

Up to 38 mm	600 N
From 38 mm	800 N
From 66 mm	1200 N
From 110 mm	1500 N

Temperature resistance:

max. temperature	110 °C
min. temperature	-40 °C

Pipe ring material	Steel DC01 (accord. DIN EN 10130)
--------------------	-----------------------------------

Surface finish	Galvanized
----------------	------------

Inlay material	EPDM rubber
----------------	-------------

Hardness inlay material	40 ± 5 Shore A
-------------------------	----------------

Average noise reduction	$\Delta L = 17 \text{ dB (A)}$
-------------------------	--------------------------------

Connection boss thread (mm)	M8/M10
-----------------------------	--------

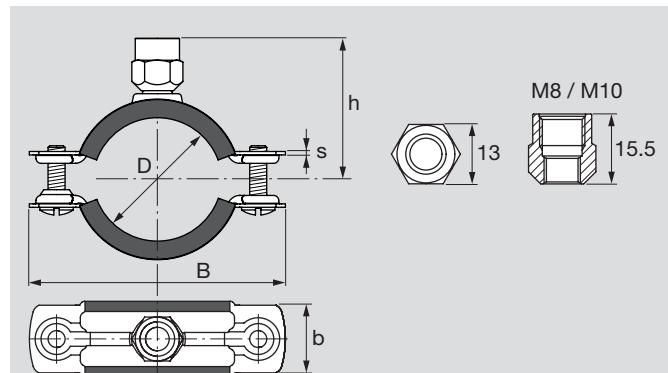

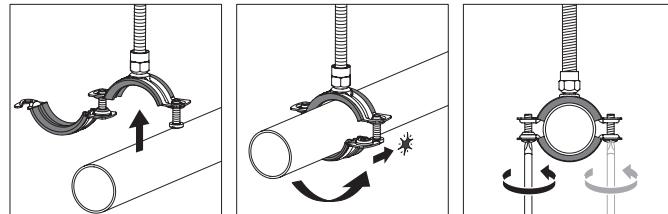

Wrench size (mm)	13
------------------	----

Technical remark	Only for dry indoor applications
------------------	----------------------------------

#### Additional information

Threaded rods must be screwed in fully into the connection boss in order to ensure the achievement of given loads.

Maximum screw torque of the clamping screw: M5 – 1.0 Nm; M6 – 2.0 Nm
