VSH Shurjoint M07 quick install coupling

The VSH Shurjoint M07 quick install coupling allows you to install faster and with less effort and costs. The M07 ensures uniform gasket support and stability with our patent-pending wedge design. The one-handed operation with 1-bolt design provides simple and quick installation.

optimal support

the integrated wedge properly supports the quick install gasket insuring uniform compression.

optimized for insulation

the revolutionary break away bolt easily snaps off after installation, needing only standard insulation clearance.

quick install gasket with lifetime quality

the innovative gasket-design ensures quick and optimal placement during installation. The EPDM gasket ensures durable sealing at a wide temperature range of -34°C to 121°C.

easy mounting

the hold open clip keeps the M07 in an open configuration providing simple and quick installation.

quick install

with our 1-bolt design there is no need to adjust the hinge bolt prior to installation.

advantages VSH Shurjoint M07 quick install coupling

- quick install design, no need to disassemble the coupling prior to installation
- up to 70% time saving, per coupling
- 1-bolt coupling design, only needs fastening on one side
- one-handed operation by application of a hinge and hold-open clip
- patent pending wedge design, applying uniform compression to the gasket
- draw bolt can be shortened for easy insulation
- the M07 is part of the VSH Shurjoint piping system, which in turn can easily be connected to VSH XPress or VSH PowerPress® piping systems

VSH Shurjoint

VSH Shurjoint is a complete grooved piping system range including couplings, fittings and valves

VSH Shurjoint Grooved fittings

VSH Shurjoint Valves

VSH Shurjoint Ring Joint

VSH Shurjoint Plain-End
